Tunes on the Triangle (Staci Marrese-Wheeler + Others)

Would love to have ECA, El Jardin Infantil, Madison Shakespeare, WI Food Forests and Ethical Trading Co. involved in this neighborhood event. It has been a lovely celebration of community and the schools in past years! A live music tent, pie auction and sale, food trucks, kid's activities, a pop-up school supply stand have all been part of it in the past. We had around 500 people participate in 2019. We would really like it to have a block party feel to it and your involvement would only make it better!

Please find the Zoom link to our initial planning meeting on April 28th, below. You are all welcome to attend. If you cannot make that meeting, but want to talk more about this event just let me know. Date TBD in September once we know when the Schenk Elementary back-to-school night is so that we can coordinate with them.

Starkweather Drive Prairie Planting (from Maddie Dumas at Madison Engineering) (see photo below agenda for map of planted area)

--Last fall, we decided not to sow seed as the terrace was covered in fall leaves. Instead we took our seed mix and artificially stratified it this winter. We sowed the mix on site this past Friday 3/25. Please see the attachment for the list of what we sowed. With the exception of some of the grasses, all seed was collected on Engineering land! (Seed list here)

--Areas sowed include all the terraces from right next to the driveway at 3401 Hargrove St, up to Dawes. We didn't sow seed in the small triangle of soil by the new bridge crossing at the Hargrove end. We also skipped sowing the "duck crossing" area near 3401 Dawes St.

-Observed growing in the terrace already is plenty of yellow rocket, a common broadleaf weed. Like most mustards, it's a biennial. Frank Hassler also noted Kentucky blue grass growing in the area last fall. We will have weed competition. In the first year of a prairie planting it is crucial that it be mowed. This might seem counterintuitive—after all, we don't want to mow up our prairie plants! Fortunately our native prairie species will take a longer time to germinate and establish than weeds, so when we mow, we are lopping the heads off annual weeds and effectively stopping their reproduction, as well as stressing and/or preventing perennial and biennial weeds from setting seed. Our chances of success at establishing this planting are very low if we don't mow this first year. Sometimes we may also want to mow into year two. As such, we are looking for volunteers to mow the prairie planting, particularly this growing season! Please reach out if you are willing to mow (MDumas2@cityofmadison.com).

Board Officers: Board Members: Alternates: Emily Mixon, President Patrick Soukup Cindy Colombo Emily Sprengelmeyer, Vice President Breanna Illéné Dan Zimmerman, Treasurer Kathy Soukup Jennica Skoug, Secretary **Brian Juchems** Kris Whitman

Based on the kind of mower you have, we may need to mow more frequently than is typical, as a traditional home lawn mower usually doesn't have a setting higher than 4" or so (we'd ideally like a setting at about 6"). We can work with a lower mow setting if we mow more frequently.

--If anyone has native plants they would like to donate, that would be great! Let me know what species and what you're thinking. We may wish to install these in fall or spring 2023 so we can mow without fear of taking out a faster-growing more established plant.

Mowing will comprise most of the management for this year, but it will also be helpful to have eyes on the site. We may choose to pursue other management options as needed. I'll be keeping an eye on the planting as well of course!

Thanks everyone for your interest in helping out. This project is happening solely due to the interest and assistance we were offered by volunteers. As I said before, we don't have a budget for plants, seed or maintenance here. This is truly a neighborhood effort.

For the March 2022 newsletter, Thysse printed 3,404 copies to send out via EDDM and sent to me 150 copies, which provided me with 30 copies to send to the advertisers and 120 for LENA to hand deliver with no leftovers; which LENA feels will be sufficient for the future. I suggest that for the next newsletter, we request the same number of copies (3,404) for EDDM distribution (and more if the post office determines there are new residences/businesses on the identified postal routes) plus 180 to be delivered to me, which will provide some extra copies for the Pinney Library. So, the total request should be for 3,580 copies.

The following table provides the budgeted and actual expenditures for the newsletter for the March 2022 issue. The reason that the actual costs are much less than budgeted is that we anticipated the March issue to be 24 pages, but was only 20 pages. Future issues may be 24 pages.

	Budgeted per issue	Actual costs
printing of 3,404 copies	\$2,872.67	\$2,354.18
mailing of 3,254 copies	\$616.00	\$615.01
total	\$3,488.67	\$2,969.19
